COMPLIANCE & REGULATIONS

Building a Safer Workplace Through Compliance

Workplace safety compliance is the foundation of responsible business operations. Adhering to legal requirements protects employees, contractors, visitors, assets, and business continuity while creating a culture of safety and accountability.

Organizations that proactively manage occupational health and safety risks experience fewer incidents, improved productivity, enhanced employee confidence, and greater operational efficiency.

Key Legislation & Standards

South Africa:

- Occupational Health and Safety Act (Act 85 of 1993)
- Construction Regulations, 2014
- Driven Machinery Regulations
- General Safety Regulations

International Standards:

- ISO 45001:2018 Occupational Health & Safety Management Systems
- EN 795:2012 Personal Fall Protection Equipment – Anchor Devices
- CEN/TS 16415:2013 Multiple User Anchor Devices
- EN 365:2004 Inspection and Maintenance Requirements
- ISO 31000 Risk Management

Industry Best Practice

Leading international organizations implement:

- Regular risk assessments
- Documented safe work procedures
- Employee competency training
- Annual equipment inspections

- Fall Protection Plans
- Rescue Procedures

How DECAWAT Assists

DECAWAT assists clients with:

- OHS Compliance Audits
- Fall Protection Plans
- Risk Assessments
- Safety Files
- Engineering Certification
- Lifeline Certification
- Training and Competency Programs

By partnering with DECAWAT, clients gain practical compliance solutions aligned with local legislation and international best practices.
