

## INSPECTION & MAINTENANCE

### INSPECTION & MAINTENANCE

#### Ensuring Ongoing Safety and Reliability

Fall protection equipment must remain fit for purpose throughout its service life. Regular inspection and maintenance help ensure systems continue to perform as designed.

International standards require periodic inspections by competent persons.

#### Relevant Standards

- EN 365:2004
- EN 795:2012
- ISO 45001
- Manufacturer Inspection Requirements

#### Inspection Activities

- Visual inspections
- Structural integrity assessments
- Torque verification
- Wire rope condition checks
- Corrosion assessments
- Anchor load verification
- Identification tag verification

#### Benefits of Regular Inspections

- Improved worker safety
- Reduced liability
- Extended equipment lifespan
- Regulatory compliance
- Reduced downtime

## How DECAWAT Assists

DECAWAT provides:

- Annual Certifications
- Anchor Testing
- Hydrajaws Pull Testing
- Lifeline Inspections
- Detailed Compliance Reports
- GPS Asset Registers
